

## PURPOSES OF A LIGHTHOUSE:

The two main **purposes** of a **lighthouse** are to serve as a navigational aid and to warn boats of dangerous areas. It is like a traffic sign on the sea.

## PARTS OF A LIGHTHOUSE:

\_\_\_\_\_

This is where the lighthouse keeper lives.

This is how the lighthouse keeper gets to the light room and back down.

These help ship crews see the lighthouse in the daytime.

\_\_\_\_\_

This holds the lighthouse in place in high winds.

This protected the lens and lantern and kept the light room dry.

This helps the lighthouse keeper see passing ships and the weather outside.

This is a small balcony around the outside of the light room.

These two things created the bright light for ships to see.
